EXPERIENCE

Amazon *May 2021 - Aug 2021*

Software Developer Intern

- Designed and developed a prototype web application using DynamoDB Java SDK to aggregate and display seller tax data, integrating directly into Amazon's existing tax summary codebase
- Engineered CRUD operations to persist and retrieve tax summary data, leveraging DynamoDB's Java SDK to interface with Amazon's cloud infrastructure
- Integrated frontend authentication through Amazon's SellerCentral sign-in service, ensuring secure access and a consistent user experience across the platform

EDUCATION

McGill University

B.A. in Software Engineering

PROJECTS

E-Commerce API

- Developed a RESTful e-commerce backend API using SpringBoot with JWT authentication for secure user registration, login, and role-based access control
- Designed and implemented endpoints for product management, shopping cart operations, and order processing, utilizing Spring Data JPA with SQLite for data persistence, and validated service logic with JUnit and Mockito unit tests
- Structured the application using a layered architecture with dedicated controllers, services, and repositories, applying MapStruct for entity-DTO mapping to separate API and persistence layers

Workout Tracker API

- Designed a backend API using Node.js, Express, and MongoDB with JWT authentication for user management
- Developed RESTful APIs to handle workout plans, exercises, and user data, utilizing Mongoose for schema modeling
- Ensured reliability with comprehensive unit testing using Jest and Supertest, leveraging an in-memory database for test isolation

Personal Finance Application

- Developed a financial dashboard application using React.js to provide users with insights into their account balances, transactions, and spending habits
- Created interactive charts to display account balances and transaction categories
- Implemented data fetching and processing functionalities using React hooks, enabling real-time updates of financial data and ensuring a seamless user experience

SKILLS

Programming Languages	Python, Java, JavaScript, Typescript, SQL, C, C++
Frameworks & Libraries	Spring Boot, Spring Security, Node.js, Express.js, React.js
Developer Tools	Git, Postman, Docker

COURSEWORK

COMP 206 - Introduction to Software Systems
COMP 250 - Algorithms and Data Structures
COMP 302 - Programming Languages and Paradigms
COMP 303 - Software Design
COMP 551 - Applied Machine Learning
